Subject: Shipment for Clinical Study
DSS: No

Paul:
I need your assistance in coordinating a shipment of study product to a Phoenix, Arizona clinical research facility that needs to be sent through a wholesaler due to the restrictions in place in Arizona.

Currently, we have obtained and are holding the product for the study here in Precon. I will need one shipment delivered to the clinical research facility no later than October 13, 2003. (Additional shipments may be needed, but those dates are still being determined.)

The details for the October shipment are as follows:
1) Point of Origin: Precon Warehouse, 13721 Jefferson Davis Hwy, Chester, Virginia, 23831, Contact: Carolyn Lilly (274-7216)
2) Point of Delivery: MDS Pharma Services, 4747 E. Beautiful Lane, Phoenix, AZ 85044, Attention: Lori Burgoyne (602-426-7166)
3) Quantity and product needing to be shipped: 52 cases total (Marlboro Full Flavor: 18 cases (12M product); Marlboro Lights: 17 cases (12M product); Marlboro Ultra Lights: 17 cases (12M product))

Also, I need to find out in what conditions and for how long the product will be maintained by the wholesaler. Specifically, I need to know whether they maintain inventory in a conditioned space, and what is the minimum/maximum period of time in which it would be in the wholesaler's storage. We are trying to determine whether we need to take certain steps to related to conditioning at the research facility. Do we need a mechanism (i.e., a PO) by which to pay the wholesaler?

Lastly, we will need to advise the research facility of the anticipated delivery date as soon as it is identified.

If you need further information in order to initiate this shipment, please let me know.

Thanks,
Valerie
